If you're interested in adding a smart assistant to your home, you might be wondering how the Facebook Portal device compares to other smart devices like the Amazon Echo or Google Home. Then you're in the right place. This article looks at everything you do with the Facebook Portal. Whichever version of Facebook Portal picks you up, you're going through the same setup process. You need a Facebook account to use a Facebook portal. Make sure you set that up before you buy your Portal. Before you get started, think about where you want to set up your portal. Some things to consider: You want a flat, stable surface that makes you look comfortable. One of the main draws of the Facebook Portal is video chat, so you want to have it in a place where you spend a lot of time and feel comfortable with other people who see them. Portals rotate to track your movement, so make sure it has room to rotate. Avoid anything that may be dangerous to electronics: direct heat sources, water, etc. Once you've selected the location: Plug in the included power cord to your Portal and then plug it into an outlet. Follow the on-screen instructions to connect your Portal to your WiFi network, and then sign in to your Facebook account. You also have several installation options, such as linking your Portal to Amazon Alexa, adding other Facebook profiles, or linking your device to other apps. The main draw of Facebook Portal is streamlining video chats. Once your Portal is set up, just say the wakeup phrase (Hey Portal) and then tell it to call a friend. It uses the Facebook Messenger interface, so whoever you call should have this option enabled. Your portal rotates to follow you and also zooms in or out when needed. You still use your Portal to do other things while you're video chatting, but you'll need to use the touchscreen interface to do so. Since your Facebook Portal has access to a variety of voice-activated smart assistants, it also has access to a variety of other features beyond video calling. Here are some of the other things you do with your Facebook Portal: Listen to Music: Facebook Portal has access to a variety of music apps, such as Spotify, Pandora, iHeartRadio and others. If you have accounts with any of these services, you'll need to link those accounts to access premium plans. Watch TV and movies: You also set up streaming video accounts so you can watch videos and movies. Find a recipe video and follow along, or sing along to your favorite music videos, etc. Set photos, weather, and birthday reminders: When you load your settings, you'll have access to an app called Superframe. There are several options available on Superframe: Add photos of your Facebook profile to cycle when the device isn't in use, set weather alerts, and even add birthday reminders from your Facebook friends. Play Games: Your portal has access to many of the games that have been optimized by Things like Sudoku and crossword puzzles are readily available on your device. Trust can be a problem with smart devices, especially with the negative press facebook has received. There are two different ways to block access to the Portal's camera: a cover is included that blocks the camera; and each device has a button that disconnects both the camera and the microphone. If you use the button to disconnect, you'll need to repress it to turn it back on. Facebook Facebook also claims that they don't listen to or save your video chats in any way. There are many options available to you if you want to add a smart assistant to your home. Facebook Portal is a good way to go if you are planning on doing a lot of video chatting. It has other available features, but video chatting is the central draw. Thanks for letting us know! Tell us why! The fleeting hour I was able to devote to Portal 2 last night, through the rest of the suddenly spacious mid-chapters, turned out to be a little better than the dull, shallow preliminary five. For starters, I wasn't just sliding in (and then out again) ugly, chipped spaces playing find the exit with a simplistic non-Euclidean angle. The rolling commentary track by Wheatley got wittier - we're so starved for even decent writing in games that a sudden smell of air like oxygen to a hypoxic brain - although given what happens later, it's devoid of character insight, settling for indulgent geekery instead (but expertly delivered). I'll cop to enjoy the design of these larger, wider areas more as well (the pipe ride in particular), much as they remind me of the creepier warehouse and dock stages in Resistance: Fall of Man. That said, the design team still doesn't trust us, visually delineating parts of portal-usable wall, floor, or ceiling space like rectangular grayish stains in a sea of pea-soup-bland paneling to make sure we know exactly what to do. All it takes is to get the sequence of actions right, a handful of quickly executed actions, some of which involve working Valve's clumsy first-person interface for grabbing objects during the middle. My sense of having solved an area never feels deserved and certainly not original, partly because my solution and your solution and someone else's solution add up to X, where X equals exactly the same. Some of these levels are so large that the main difficulty involves hitting the zoom trigger and scanning for small distant off-white slabs of concrete, a kind of Where's Waldo done with construction sectionals. I admit that the slab hunting gameplay slowed me down in these spaces, most of which deliberately obscure your opinion, but it also my sense of frustration with the artifice and reinforces a growing belief that - absent better, more flexible ideas - Valve settled for safe, blunt challenges set off amid epic ramshackle architecture to prolong the experience. I'm giving Valve the divestment gel, Portal 2's first novel. Novel. particularly those areas where you either splash it around or wash it away by redirecting streams of gummy blue seeps or viscous water. That's the kind of freeform puzzlemaking that I've been waiting half the game to see. And something (something being a lot of haven't seen-that-stuff-yet screenshots) tells me the best is yet to come. Interaction with Game On: Twitter - Facebook - Get in touch Note: When you buy something after clicking on links in our articles, we can earn a small commission.
